STARTER PLAN

Your organization's key to a fortified cyber program!

Plan Overview

The vCISO Starter Plan is designed to give organizations a jumpstart on their cyber program by providing the tools needed to identify gaps in their defenses, prioritize remediation efforts, and report progress. Start your journey to cyber excellence with our exclusive package, featuring premium access to our cutting-edge Risk Assessment platform. Elevate your security measures with a comprehensive internal and external penetration test, including a vulnerability scan covering up to 250 IP addresses.

Receive an easily customizable Incident Response Plan (IRP) template. Maximize your digital defense strategy and stay steps ahead in the ever-evolving landscape of cybersecurity.

### Gain a competitive edge with a comprehensive 12-month plan

Program includes:

- **Risk Assessment Platform:** 12-month access to our AI driven platform

- **PenTesting:** one comprehensive internal and external penetration test, including a vulnerability scan covering up to 250 IP addresses.

- **Incident Response Plan (IRP):** an easily customizable template you can tailor to meet your organization's unique needs.

Assessment Platform

Upon beginning the vCISO Starter plan, you will be provided access to our Risk Assessment platform, that will assist in navigating you through a series of straightforward yes-or-no questions, unlocking immediate access to insightful statistics and reports. Discover where you stand against industry-standard frameworks like CIS v8, NIST CSF, and NIST 800-171, along with a comprehensive mapping of critical items for review and action. As you work to close gaps, you will see your posture score increase, providing you with valuable insights into the maturity of your cyber program.
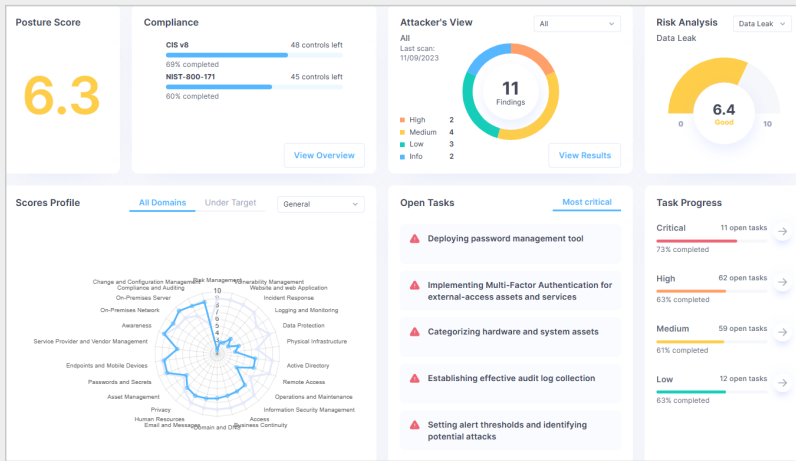

Assessment Platform

Penetration Testing and Vulnerability Scanning

View your environment through the eyes of an attacker with a comprehensive penetration test, complete with a vulnerability scan for up to 250 IP addresses. Provided instructions make setup as easy as deploying a virtual machine. In as little as 7 days you will be provided with an Executive Summary, Technical Report, and Vulnerability Report that clearly outlines the test and results.
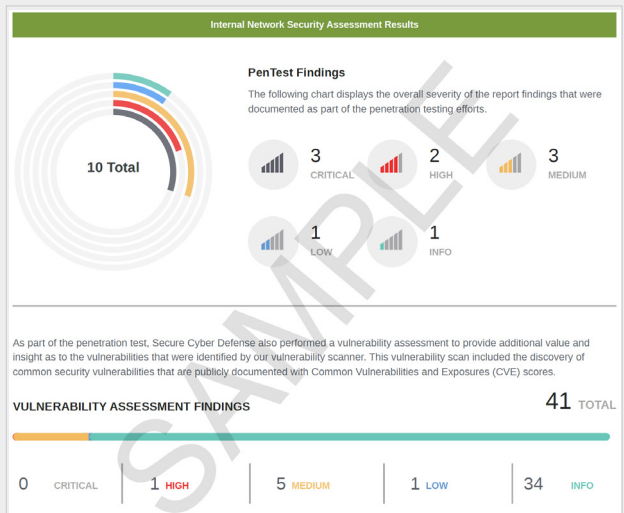

Pentest Report

Incident Response Plan

Elevate your organizational defense with a must-have Incident Response Plan! This essential tool provides a coordinated approach to dealing with cybersecurity breaches and emergencies promptly. By outlining predefined steps and responsibilities, the plan ensures a swift and efficient response, minimizing potential damage and downtime. Included in the plan is a preformatted incident response plan template that highlights critical information to help you better coordinate a response.

Rapid Results

The vCISO Starter Plan delivers a comprehensive solution, equipping organizations with all the essential tools to kickstart their cyber program, all within an affordable yearly plan. This all-in-one solution empowers organizations to proactively address cyber threats without breaking the bank, making it the ideal choice for those seeking an efficient and budget-friendly jumpstart to their cyber program.
